MD NASIM HOWLADAR

Computer Science & Engineering Undergraduate

Atish Dipankar University of Science & Technology

Email | GitHub | LinkedIn | Kaggle

Phone: +8801845989077 **WhatsApp:** +8801315475145 **Current Location:** ,Dhaka-1216, Bangladesh

ACADEMIC & RESEARCH PROFILE

Computer Science and Engineering undergraduate specializing in Artificial Intelligence, Machine Learning, Deep Learning, and Computer Vision. Experienced in developing AI-powered systems, computer vision applications, and intelligent software solutions using modern technologies. Currently working on AI-based plant disease detection research and seeking opportunities for MSc study, research collaboration, and machine learning internships.

RESEARCH INTERESTS

Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Smart Agriculture, Intelligent Systems, AI-based Automation

RESEARCH EXPERIENCE

AI-Based Fruit and Leaf Disease Detection System

Final Year Research Project | Machine Learning & Deep Learning Applications

- Developing an AI-based disease detection system for mango, banana, and papaya plants.
- Working on leaf and fruit image-based disease identification using computer vision techniques.
- Applying machine learning and deep learning approaches for agricultural disease classification.
- Targeting future publication in Machine Learning and Deep Learning applications.

TECHNICAL SKILLS

Programming Languages

C, C++, Python, Java, JavaScript

AI & Machine Learning

Machine Learning, Deep Learning, CNN, YOLOv8, TensorFlow, Keras, OpenCV

Software Development

FastAPI, Flask, React.js, Flutter, Android Development, REST API

Tools & Platforms

Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Kaggle

FEATURED PROJECTS

AI Exam Proctoring System

Artificial Intelligence | Computer Vision | Deep Learning

Developed a real-time AI-based online examination monitoring system using computer vision and deep learning technologies. The system detects suspicious activities including face absence, multiple person detection, mobile phone usage, and unusual head movements.

Technologies: Python, Flask, OpenCV, YOLOv8, SQLite, HTML, CSS, JavaScript

GitHub: AI Exam Proctoring Repository

Potato Disease Classification System

Deep Learning | Computer Vision | Smart Agriculture

Developed a CNN-based plant disease classification system with FastAPI backend and React.js frontend for image-based disease prediction.

Technologies: Python, TensorFlow, Keras, CNN, FastAPI, React.js, OpenCV

GitHub: Potato Disease Classification Repository

Real-Time Traffic Monitoring & Speed Estimation System

Computer Vision | Intelligent Transportation System

Built an AI-powered traffic monitoring system using YOLOv8 and OpenCV for vehicle detection, tracking, classification, and speed estimation.

Technologies: Python, YOLOv8, OpenCV, cvzone, Pandas

GitHub: Traffic Monitoring Repository

Eggplant Disease Detector

Mobile AI | Deep Learning

Developed an AI-powered mobile application using Flutter and TensorFlow Lite for plant disease detection from images.

Technologies: Flutter, Dart, TensorFlow Lite, CNN

GitHub: Eggplant Disease Detector Repository

Simple E-Commerce Android Application

Android Development | Mobile Application

Developed a mobile shopping application using Java and Android Studio with product browsing, search functionality, shopping cart management, and modern UI design.

Technologies: Java, Android Studio, XML, RecyclerView, Material Design

GitHub: E-Commerce Android Repository

Competitive Programming Practice Library

Data Structures & Algorithms | Competitive Programming

A collection of C++ implementations covering algorithms, data structures, optimization techniques, and competitive programming solutions.

Technologies: C++, STL, Algorithms, Data Structures

GitHub: Programming Practice Repository

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science & Engineering

Atish Dipankar University of Science & Technology

CGPA: **3.68**
Expected Graduation: **December 2026**

Higher Secondary Certificate (HSC)

Srijanee Bidyaniketan (PSTU)

Science Group
Batch: 2021
GPA: 4.75

Secondary School Certificate (SSC)

Chargrabdi Abul Kashim School

Science Group
Batch: 2018
GPA: 4.50

CERTIFICATIONS

- Machine Learning Certificate
  Organized by Department of Computer Science & Engineering
- Inter Department Programming Contest Certificate
- Excel Essentials Workplace Certificate
- Workplace Combination Essential Certificate

CAREER OBJECTIVE

Seeking opportunities for MSc in Computer Science with a specialization in Artificial Intelligence and Machine Learning, as well as research-oriented internships in AI and software development. My goal is to contribute to innovative technology solutions through advanced research, practical implementation, and continuous learning in intelligent computing systems.
